Cynthia is at CFAC and I just left an appointment but looks like you have it covered. I'm back in tomorrow and Cynthia is back in Friday. She does not have email access. Libby

FYI. Mark Salley, PIO at CDPHE just called about a significant mine blowout at the Gold King mine near Silverton that has or is expected to send a large volume of water/heavy metals through Cement Creek and the Animas, affecting Silverton and downstream. I have no details beyond Mark's vm, but Mark seems to think this would be our lead in terms of a response and notifying downstream water users, intakes etc. Not sure that conclusion necessarily makes sense to me but we should discuss... I'll let you know if I receive additional info. Please share if you have info as well.
